UNDERWATER
TREADMILL

STANDARD

Underwater Treadmill for K9s

Low impact

Using the thermal effects of water can help dogs, cats, and other pets relax during pet therapy. Warm water has the ability to lessen pain and can make connective tissue flexible, thus allowing better range of motion and deeper stretching. The warmth of the water can also increase blood flow and increase the pet's motivation, speeding up recovery. Since water aerobics and various forms of water therapy are considered "low-impact," many pet rehabilitation specialists opt for water rehabilitation.

FEATURES

Pets can enjoy many advantages from underwater treadmills. The buoyant properties of water minimize the weight that is bearing on the bones and joints of the dog or cat. We can raise or lower the level of water according to how much or little weight we want your pet to place on his leg to return it back to a normal gait pattern. Reducing the weight put on the bones and joints is highly important to increase endurance and strength.

The speed of the treadmill can be customized to each pet based on the length of the pets' legs and how much exertion the pet is putting forth.

360 GLASS WALLS.

ADJUSTABLE SPEEDS
FORWARD AND
REVERSE FUNCTIONS
EMERGENCY STOP

EASY ACCESSIBLE RAMPS

STANDARD PUMP AND FILTER
ECO FRIENDLY HEATING SYSTEM

1700 L STORAGE TANK

PLATFORMS INSIDE THE CHAMBER

1-8 KM/H UP TO 150KG

STANDARD CONTROL PANEL
SPEED AND ANGLE WILL BE
VISIBLE ON A DISPLAY.

MORE FEATURES INCLUDE:

- o Side Windows
- o Two doors with windows.
- o Variable speed control, adjustable with knob.
- o Operator interface panel on a swivel.(not touch screen)
- o Emergency ball valve Drain.
- o Cartridge Filter inside tank.
- o Removable Chair for operator
- o Operator platforms inside chamber.
- o Incline adjustment (10 degrees), adjustable with knob
- o Easy clean Basket filters.
- o Heating system
- o A basic maintenance and operator manual that consists of the operational sequence, start-up procedure, trouble shooting, cleaning instructions , standard parts list (including supplier name and warranty period) & electrical diagrams.
- o Filling and empty functions will also be done from the operator interface panel.
